EDUCATION

Queen's University

Bachelor's of Health Sciences

Kingston, ON

Expected Graduation May 2030

John Fraser Secondary School

AP Student

EXPERIENCE

Technology Executive

September 2023 - June 2026

Student Activity Council

Mississauga, ON

- Replaced an out-of-date announcement board by developing a live announcement website using NextJS, improving accessibility for over **1,000+ students**
- Eliminated ticket fraud risk for the school's biggest event, replacing all physical tickets by engineering a **digital wallet system** that processed **\$15,000+** in sales.
- Centralized school communication and enhanced event experiences for **1,000+ active users** by programming multiple websites such as an application dashboard, elections page, and voting dashboard.

Teaching Executive

September 2024 - June 2026

JFSS HOSA

Mississauga, ON

- Coached HOSA members to **multiple top-10 national placements** by designing structured study programs and mock competition sessions
- Grew club application volume by **83%** by overhauling the recruitment process and expanding outreach across the school

Busboy

March 2026 – July 2026

Mandarin Restaurant Erin Mills

Mississauga, ON

- Maintained consistent service quality in a high-pressure environment by supporting a dining floor of **400+ simultaneous guests** during peak hours
- Contributed to smooth kitchen-to-floor operations by coordinating with a team of **50+ coworkers** across multiple stations

Vice President of Logistics

June 2024 – April 2026

HackCanada

Waterloo, ON

- Coordinated logistics for a **48-hour** hackathon with **1000+ participants**, ensuring smooth operations across sponsors, scheduling, and event execution
- Managed distribution and organization of **\$20,000+** in prizes and sponsor resources for attendees and competition winners

ACHIEVEMENTS

National Champion & International Finalist | HOSA Veterinary Science

March 2025 – June 2025

- Placed **1st nationally** and **8th** in a veterinary science competition against **200+ national** and **212 international competitors**

PROJECTS

Methanogenic Interception of TMA by *M. luminyensis* to Reduce TMAO-Driven Cardiovascular Risk

March 2025

- Proposed **ArchaeBiotic**, a novel oral capsule treatment, in a **6-hour** microbiology research competition, designed to divert trimethylamine (TMA) toward methanogenesis instead of its conversion into cardiovascular-disease-linked TMAO
- Designed a dual-action delivery mechanism combining a pH-sensitive hydrogel shell for colon-targeted release of *M. luminyensis* with a prebiotic seaweed fibre to sustain hydrogen-dependent methanogenesis
- Synthesized findings from **9 primary sources** spanning gut microbiology, drug delivery, and cardiovascular disease to support the treatment's mechanism, safety rationale, and cost-effectiveness
- Collaborated with 2 peers under strict time constraints to research, write, and finalize the proposal
